PROFESSIONAL SUMMARY

10+ years of making software ship faster and with fewer defects — and the pattern never changes: find where the process breaks, redesign it, measure the result. A 50% regression cut at Wipro. An 85% cycle time reduction at EPAM. In 2025, I stopped automating tests and started automating the people who write them. At EPAM, I designed and shipped a 3-agent pipeline (BA Agent → QA Agent → Automation Agent) now live across financial services clients. It reads a business epic, writes Jira stories, generates test cases, and extends automation code. QA reviews, not writes. 30–40% QA effort reduction, in production. Currently embedded as automation lead in a new financial domain team — understanding their architecture from the inside to accelerate delivery. Open-source contributor to EPAM's ELITEA Slack toolkit.

TECHNICAL SKILLS

Agentic AI & LLMs: OpenAI Agents SDK, MCP (Model Context Protocol), Anthropic Claude, Prompt Engineering, RAG, LLM Evaluation, Agent Orchestration, LangChain

Test Automation: Selenium WebDriver, Serenity BDD, TestNG, JUnit, Cucumber, REST Assured, Postman, HP UFT, Test Strategy & Framework Design

Languages: Java (10+ yrs), Python (fluent), C# (working)

CI/CD & Tools: Jenkins, Bamboo, Git/Bitbucket, Maven, JIRA, Confluence, Azure Cloud Services

Methodologies: BDD, TDD, Agile/Scrum, SDLC, API Testing, UI Automation

Languages (Spoken): English (Bilingual), Malayalam (Native), Tamil, Hindi, German (Basic)

PROFESSIONAL EXPERIENCE

Senior Agentic AI Engineer | Senior Automation Engineer

Dec 2022 – Present

EPAM Systems

Remote (India)

- **Designed and shipped a 3-agent production pipeline on EPAM's ELITEA platform — BA Agent, QA Agent, and Automation Agent — that fully automates the requirements-to-test-code handoff for financial services clients. 30–40% reduction in manual QA effort across 3–4 active client engagements, running in production.**
- **BA Agent:** Takes a business epic, auto-generates structured Jira PBIs with acceptance criteria — eliminating ~30% of manual story-writing effort before QA begins.
- **QA Agent:** Consumes BA Agent output, auto-generates structured test cases — cutting test authoring time per story significantly.
- **Automation Agent:** Generates new Selenium test code from JSON pattern templates, extending existing suites without starting from scratch — enabling reuse across projects.
- Tech stack: LangChain, OpenAI Agents SDK, Anthropic Claude; orchestrated GPT-5 family and Anthropic Claude models via the ELITEA platform.
- Built a Serenity BDD automation framework from scratch for a new team — 500+ test cases, used by 10 engineers, integrated with Jenkins CI/CD; reduced regression cycle from 1 week to 1 day (~85% reduction) and achieved 60% application coverage.
- Ran internal tech talks and live demos on AI agents — drove adoption of ELITEA across EPAM teams.

- Recognized as India Fearless Problem Solver (Mar 2025) for impact on the ELITEA initiative.

Senior Test Engineer

May 2021 – Dec 2022

Ernst & Young Global Consulting Services

Kochi, India

- Migrated 100+ BDD Cucumber test scripts to EY's internal Azure-based codeless automation platform, improving test execution efficiency by 25% and significantly reducing manual regression effort.
- Developed Python utilities to fetch Azure VM runtime data and server metrics, streamlining daily operations for the cloud infrastructure team.
- Recognized as Best Automation Engineer of the Month (Dec 2021 – Jan 2022).

Senior Test Engineer

Jan 2016 – Apr 2021

Wipro Technologies

Bengaluru, India

- Designed and built a Selenium + Java automation framework that reduced regression testing time by 50% and significantly expanded test coverage for the financial services client.
- Partnered with business analysts and stakeholders to translate complex business requirements into clear, testable acceptance criteria — reducing rework and improving release quality.
- Mentored junior testers and led Agile sprint QA cycles with a focus on quality, efficiency, and team collaboration.

OPEN SOURCE & SIDE PROJECTS

- **EPAM ELITEA Slack Toolkit (Open Source)** — Contributor. Merged pull requests adding Slack integration capabilities to the toolkit. Submitted from personal GitHub account (github.com/SruthyPlakkat).
- **Currently building** — Agentic AI projects using Claude APIs, MCP (Model Context Protocol), and multi-agent orchestration — exploring Claude skills, plugins, and hooks to automate complex QA workflows.

CERTIFICATIONS

- **Google Cloud Generative AI Leader Certification** — Issued via Credly.
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Earned Dec 2021.
- **Microsoft Certified: Azure Data Fundamentals (DP-900)** — Earned Jun 2021.
- **Microsoft Certified: Azure AI Fundamentals (AI-900)** — Earned May 2025.
- **Salesforce AI Associate.**

EDUCATION

M.Tech (Integrated), Information Technology

2012 – 2020

Vellore Institute of Technology, Bengaluru

AWARDS & RECOGNITION

- India Fearless Problem Solver — EPAM Systems (Mar 2025)
- Best Automation Engineer of the Month — Ernst & Young (Dec 2021 – Jan 2022)
